Working together, Zippo and Case have created a select assortment of premium hand crafted knives for our Promotional Products line. It is only natural that we would look to the best name in the cutlery business to proudly carry our name ... and now yours.

Imprint Areas

The imprint areas shown throughout the catalog are for surface imprint, laser engraving, auto / computer engraving and pad printing in one or two colors. The maximum number of pad print colors that we can imprint per product is four (4). If you want to pad print in more than two colors, the imprint size may decrease in size depending on the size of the product. Please call Zippo for details and exact imprint areas.

Imprint Methods

Surface Imprint (SI)

Surface imprinting is a silk-screening process using a separate screen for each color. Durable epoxy paint is applied to the finish, building a rich and vibrant image.

The product is oven-cured, bonding the epoxy imprint to the surface, where it becomes an integral part of the finish.

Pad Printing (PP)

Pad printing is a versatile process due to its unique ability to print on three-dimensional objects. The image to be transferred is etched into a printing plate called a cliché. Once mounted in the machine, the cliché is then flooded with ink. The pad is positioned over the cliché, the pad picks up the image and transfers it to the desired substrate location. The image is deposited completely and leaves the pad ready for the next cliché.

Computer Engraving (AE)

The crisp, clean look of computer engraving has become one of the most popular customization methods Zippo offers. Skilled operators use either the rotary engrave or diamond cut method to inscribe an image into the product. Each engraving machine is custom programmed through a keyboard or from digitized artwork.

Laser Engraving (LA)

Laser engraving is one of the most popular customization methods offered by Zippo. The state-of-the-art process allows tremendous flexibility in reproducing your artwork on our products. Our laser engravers are computer-programmed to generate a crisp, accurate replication of your artwork. Laser engraving is now available on most Zippo products. Show us your artwork and we will tell you if Laser engraving will work for you.

Embossing/Debossing (HS)

Zippo's newest customization method is dimensional hot stamp on our leather products. A magnesium die is created from the customer's artwork, then a one-ton press and the heated die are used to hot stamp the design into the leather product. Embossing stamps the logo lower than the surface of the product; debossing shows the logo raised above the surface of the product.

Imprint Charges

The price schedules shown throughout the catalog include the product with artwork on one surface in 1 color (pad print or surface imprint), lustre etch, laser, or computer engraving. See imprint methods available on each product page.

Shipping

Zippo will ship according to customer routing instructions whenever possible. Purchase orders not indicating specific routing instructions will be shipped according to our best judgment. Zippo can only assure shipping dates from F.O.B. point, and cannot be responsible for carrier or en route delays. All prices shown in the catalog are F.O.B. Bradford, PA. Shipping charges will be prepaid and added to the invoice. Title to merchandise passes to buyer at the F.O.B. point. Merchandise is shipped at buyer's risk, and any claims for loss or damage must be filed against the carrier. MPLs ship via DHL with no hazardous materials charge. If you want to ship MPLs via UPS, there is a \$20.00 hazardous materials charge per shipping carton (one carton holds from 50 to 150 units). Retain all shipping cartons for inspection by carrier in the event of a claim.

Shipping weights and sizes noted in catalog are approximate. For motor freight shipments, the distributor must file claims directly with the carrier within 15 days. For UPS / Fed Ex shipments, recipient must notify shipper and file claim within 10 days. C.O.D. shipments are not available. Our primary shipper is UPS, for which we charge the common carrier rate. DHL is the standard shipping method for the MPL (Multi-Purpose Lighter). If you prefer to ship by any other means, please specify on your purchase order.

Standard Colors

See standard colors for pad printing inks on page 49. Pantone colors will vary based on the background color of the product or substrate.
